6 counties

Perinatal Vulnerability Index

Overall PVI Score 
27.5 54.5

Pennsylvania Low Birth Weight Births

■ Low birth weight (LBW) (<2500g) ■ Very LBW (<1500g)

Thriving PA supports building a comprehensive and coordinated system of care and supports for Pennsylvania moms and birthing people by:

- Establishing a perinatal psychiatric access pilot program.
- Ensuring every birthing person has access to coverage during pregnancy by advocating for CHIP coverage for pregnant immigrants and their babies.
- Collaborating with DHS to expand and ensure the sustainability of the Managed Care Home Visiting initiative.
- Monitoring progress toward Medicaid reimbursement for Doula services.
- Supporting campaigns advocating for universal paid leave in PA and a state Earned Income Tax Credit.

Thriving PA is a non-partisan, statewide campaign that seeks to improve the quality of and increase equitable access to a coordinated system of health supports, including access to comprehensive perinatal health services, children's health insurance, nutrition supports, and lead screening and abatement.

The Perinatal Vulnerability Index is a composite measure developed by Pennsylvania Partnerships for Children. Low birth weight data is provided by PPC through analysis of information provided by the Pennsylvania Department of Health. The Department specifically disclaims responsibility for any analyses, interpretations, or conclusions.
